

K-love informs me of events in my community as well as gives me and my family a positive outlook on our lives and our community. If you were to replace K-LOVE with an LPFM you could be replacing any piece of positive news our community might hear and could adversely affect people's lives. I believe that K-LOVE serves an important part of our community by reporting important information that we as citizens of the community need to hear and they convey a positive message about life, which in this day and age we all need.
